

KOREAN SPORTS NUTRITION • DEVELOPED
& MADE IN-HOUSE

Two world-first technologies, rebuilding sports fuel.

OLLLA does not outsource. Formulation, texture and format all happen in our own factory — which is how we built two things nobody else has: a pH-responsive hydrogel energy gel that does not break down in the stomach, and a 149 mOsm/kg hypotonic electrolyte energy drink.

OLLLA NUTRITION • Yangju, Gyeonggi-do, South Korea • HACCP-certified plant • Est. 2021

01 BRAND

Self-production, without compromise.

Seven years distributing sports nutrition, then our own production line from 2021. From raw material selection to shipment, every decision stays in-house — not to cut cost, but to make products that do not exist yet.

Sponsored athletes & coaches

24月

Months shelf life · no preservatives

01 Made by us, not by a contract manufacturer

We choose the ingredients and set the formulation direction, so field feedback reaches the next production run directly.

02 Many SKUs, small batches, made to order

No large standing stock. Product arrives fresh, and a trial order into a new market stays easy.

03 Production date printed on every product

Every unit carries its production date — full transparency down the channel.

04 No artificial preservatives

A sterilization process delivers 24 months at ambient temperature with no preservatives added.

02 CORE TECHNOLOGY

Why does an energy gel upset your stomach?

A normal energy gel is a hypertonic product. Concentrated carbohydrate disperses as soon as it hits the stomach and pulls water in to balance concentration. During exercise, blood flow to the gut is already reduced — that is where the bloating and discomfort come from.

WORLD FIRST

pH-Responsive Hydrogel • Hydro Energy Gel

OLLLA encapsulates the carbohydrate inside a gel structure and uses the pH difference between stomach and small intestine to control when it is released — the gel holds in the stomach and only opens further down.

1 INTAKE

Soft hydrogel texture,
easy to take mid-effort

2 STOMACH

The gel structure holds
in the acidic environment

3 SMALL INTESTINE

pH changes and the gel
begins to break down

4 RELEASE

Carbohydrate is released
and absorbed

NORMAL ENERGY GEL

In the stomach	Concentrated carbs exposed at once
Gut load	Bloating / discomfort possible
Energy delivery	Fast spike, larger swing
Best for	Short distance, sprints, lifting

OLLLA HYDROGEL

Gel structure maintained
Designed to reduce it
Gradual, sustained release
Marathon, cycling, triathlon, trail

EXCLUSIVE

HYPOTONIC 100

For hydration during exercise, hypotonic beats isotonic. HYPOTONIC 100 measures 149 mOsm/kg against body fluid at 275–295 mOsm/kg — less time sitting in the stomach, less sloshing, and carbohydrate–sodium co-transport carrying water across in the small intestine.

149 mOsm/kg

Hypotonic · body fluid 275–295

SEPT 2026 • NEW CATEGORY

OLLLA Candy Series • 8 new SKUs

Electrolytes, fast energy, buffering, focus — everything an athlete needs before, during and after, in a single candy. Two of them are daily-hydration products, moving the use case from sport into everyday habit.

- Ion Balance
- Ion Balance ZERO (effervescent)
- Salt Elec
- Sports Dextrose
- Energy Dextro
- Bicarb 2,000 mg
- Caffeine 20 mg
- Nootropic Palatinose

8.12%	12.7%	35.8%
Global sports supplements CAGR 2025→2032	Electrolyte supplements CAGR 2026→2035	Asia-Pacific share of global market 2024

Within our research, we found no competitor covering all six categories — electrolytes, caffeine, nootropics, dextrose energy, bicarbonate buffering and daily effervescent — under one brand.

04 PARTNERSHIP

Direct manufacturing. Clear terms.

No minimum order quantity — you can test the market with a single trial order. That is what owning the factory allows.

Delivery	FOB Incheon, South Korea	Payment	T/T • 50% on order Balance 50% after shipment
Minimum order	No MOQ requirement	Lead time	2–4 weeks
Shelf life	24 months, ambient storage	OEM / ODM	Available Quantities and terms quoted separately
Chinese labelling	Can be produced to Chinese market requirements	Distributor pricing	On request — please ask for the price list
